Hearing script (2–3 minutes)

Good morning. I'm Jordan Sample, owner of folio 30-4019-001-0100.
Comparable sales support a just value of $568,000, not $655,000.
My evidence uses 5 qualified, arm's-length sales from the 18 months before January 1, 2026, all of the same property type and close by.
After adjustments, they indicate $706,000.
The house needed $37,500 of repairs on January 1; the estimates are in my exhibits.
With the required cost-of-sale adjustment, that is $568,000, which I ask the Magistrate to adopt.
Thank you. I'm happy to answer questions.

If the Property Appraiser says...

They may argue	You can respond
Your comparables are not similar to the subject.	Each sale is a qualified sale of the same property type, filtered to within 25% of the subject's living area and 15 years of its age, with every adjustment shown in the grid.
The sales are too old.	Every sale closed within 18 months of January 1 and is time-adjusted to that date using the neighborhood trend.
Our mass-appraisal model already considers these sales.	The burden is whether the just value reflects market value for this specific property. The adjusted sales show it does not.
The condition issues are not reflected in a sale.	Buyers deduct repair costs from what they pay. The contractor estimates document the cost a buyer would face on January 1.
